

## Underwater Repair Putty (UW)

### Description

Metal-Tek epoxies are two component systems that harden by the addition of a curing agent to the resin. Cured epoxies can be drilled, tapped, machined or painted. Metal-Tek (UW) offers high performance technology for repairing, patching, and rebuilding equipment in habitually wet environments, including under water.

### Applications

Wherever hygiene and corrosion resistance are important. Repair of machinery and equipment in food processing and packing plants, dairies and chemical plants.

### Benefits

- Resist rust
- Eliminates the need for substrate to be thoroughly dry before repair
- Penetrates wetness to bond securely to steel, aluminium, iron, brass, bronze, concrete, wood, and some plastics

### Product Features

- Boiling point >260°C
- Multi-purpose
- Machinable
- Chemical resistance
- Corrosion resistance
